

Adelaide House

Watts were appointed by St Martins Property Investment Limited to Project Manage the refurbishment of office accommodation at Adelaide House, a Grade II listed building.

Watts carried out a tender process to assist St Martins in selecting the Design Team for this project. Upon completion of Design Team appointments, a feasibility study will be undertaken to develop a range of options to create high quality office space in a prime location in the City of London.

Considerations will also be given to the feasibility of providing additional amenity space which can be used by the public, improving the area along the Thames for the public.

Following the feasibility study and careful consideration of possible options, the design will progress further on the most economically advantageous proposal regenerating an iconic location at the end of London Bridge on the River Thames.
