

Rank Group

Rank Group's new offices are intended to act as a catalyst for change and support modern, flexible working, reflecting the growing multi-channel, digital environment in which the business operates.

Ranging over two floors, the space will be home to the Group's corporate headquarters for their gambling and media divisions across open plan and cellular offices, as well as a state-of-the-art meeting suite.

Watts' Project Management team has worked closely with the client to select and appoint the design & build contractor and devise a concept that met the quantitative and qualitative brief. The project completed in May 2017.

The client's objectives for the new headquarters facility were:

- Create an exceptional office space and working environment for their current staff.
- Create an office space that is sector market leading and differentiates them from their employment competitors.
- Create a space that accommodates their current and future needs.
- Use the budget wisely to achieve real quality, value and practicality to finishes, function and usability.
- Reflect/celebrate the fun and excitement of their businesses within an office context.
