

Ventura Park - Unit 4 & 5

After an initial appointment as Building Surveyors, Watts were appointed as Project Manager / Employer's Agent for the project to deliver the capital works ready for letting by the Client.

Our brief included tenant dilapidations work, the upgrading of finishes and services to provide a modern space for warehousing or light industrial use.

It was necessary to work closely with the Client to refine their brief and then develop it into a full scope of works for procurement to ensure that the appointed contractor had a complete specification and the Client had cost and programme surety.
