

Programme Management

Watts has wide experience in multiple project environments, allied to a specialism in the care and development of existing buildings. This gives us particular strength in programme management.

Our services include:

- Developing a comprehensive brief and set of standards
- Preparing project and programme plans and targets
- Appointing teams of specialist support professionals
- Developing a design and management manual
- Directing pilot projects
- Directing and monitoring the cost, time and quality aspects in the delivery of the programme
- Monitoring, evaluating and improving processes as the programme proceeds
